# WRITING JOM QUERIES, EQUIALENT, AND/OR RECURSINE QUERIES

Alm: - To implement and execute Join quires equivalent quires and recursive quires using 3 universal doubles database swario.

Procedure: \* create database and tables

\* Insert Sample data

\* write SQL quiries using diff. types of JOINTS

\* Implement recursive owny.

\* Ouplay results

Step 1: Types of Join: 1) simple 2) self 3) outer
1) simple Join:

(1) Equi-join:

quiny , select \* from employee , night, shift where employes employ = night-shift, employ

## output!

| empid | emp_Name   | company | salary   | age | Join Loale |
|-------|------------|---------|----------|-----|------------|
|       | venu       | HCL     | 10000001 | 21  | 2018-07-06 |
| (0    | shyam      | LIC     | [11]     | 20  | 2020-07-06 |
| , Um  | srikrishna | CII     | 2220100  | 20  | 8021-08-01 |
| [0]   |            | 3 76 5  | 7        |     |            |

ii) Non-equi join:

Select \*from employees to lost shift where employes, age;
